Median Activity of MRs in Pathways specific to INV High
ApoE and miR−146 in inflammation and atherosclerosis [4/8]
Control of immune tolerance by vasoactive intestinal peptide [3/13]
Regulation of TLR by endogenous ligand [3/16]
Polo−like kinase mediated events [3/16]
Cells and molecules involved in local acute inflammatory response [3/17]
IL1 and megakaryocytes in obesity [4/24]
Extracellular vesicles in the crosstalk of cardiac cells [3/21]
Neovascularisation processes [4/29]
Selective expression of chemokine receptors during T−cell polarization [4/29]
GDNF−RET signaling axis [3/23]
Interactions between immune cells and microRNAs in tumor microenvironment [5/39]
Cyclin A/B1/B2 associated events during G2/M transition [3/24]
Cytokines and Inflammatory Response [3/26]
Type II interferon signaling (IFNG) [4/36]
The role of Nef in HIV−1 replication and disease pathogenesis [3/28]
Fibrin Complement Receptor 3 Signaling Pathway [4/40]
Acute viral myocarditis [6/78]
TYROBP causal network in microglia [4/60]
Modulators of TCR signaling and T cell activation [4/61]
T−cell receptor (TCR) signaling pathway [5/90]
TGF−beta Signaling Pathway [7/132]
Epithelial to mesenchymal transition in colorectal cancer [8/159]
Regulation of toll−like receptor signaling pathway [7/143]
Toll−like Receptor Signaling Pathway [5/103]
Ebola Virus Pathway on Host [6/128]
Adipogenesis [6/130]
Signaling by Interleukins [7/225]
Cytokine Signaling in Immune system [10/452]
Immune System [25/1692]
Signal Transduction [30/2350]
