

# Enriched Pathways for INV Low Phenotype

Enriched Pathways

Negative epigenetic regulation of rRNA expression [3/25]

B-WICH complex positively regulates rRNA expression [3/27]

Chromatin modifying enzymes [5/207]

Gene expression (Transcription) [20/1347]

RNA Polymerase II Transcription [17/1219]

Generic Transcription Pathway [14/1091]

$-\log_{10}(P.adjust)$
