Enriched Pathways for INV High MRs CLEC7A/inflammasome pathway with vascular and circulating cells hiv–1 defeats host–mediated resistance by cem15 [2/5] ApoE and miR–146 in inflammation and atherosclerosis [3/8] Pre–NOTCH Processing in the Endoplasmic Reticulum [2/6] Senescence—Associated Secretory Phenotype (SASP) [2/6] Transcriptional regulation by the AP–2 (TFAP2) family of transcription factors [4/14] BMP2–WNT4–FOXO1 Pathway in Human Primary Endometrial Stromal Cell Differentiation [2/4] antigen processing and presentation CD28 dependent Vav1 pathway Signaling by NOTCH4 IL1 and megakaryocytes in obesity 6/24 Neovascularisation processes 5/21 Neovašcularisation processes is Regulation of Wnt-B-catenin Signaling by Small Molecule Compounds & Development of pulmonary dendritic cells and macrophage subsets Cd40I signaling pathway Macrophage markers Role Altered Glycolysation of MUC1 in Tumour Microenvironment Type II interferon signaling (IFNG) & The NLRP3 inflammasome & The NLRP3 infl BMAL1-CLOCK,NPAS2 activates circadian gene expression Malaria - Homo sapiens (human) Serotonin Transporter Activity Interleukin-6 signaling Transcription factor regulation in adipogenesis Hypothesized Pathways in Pathogenesis of Cardiovascular Disease LTF danger signal response pathway Interleukin–10 signaling White fat cell differentiation Control of immune tolerance by vasoactive intestinalpeptide lck and fyn tyrosine kinases in initiation of tor activation Transcriptional regulation by RUNX3 Serotonin and anxiety-related events Prion disease pathway the co-stimulatory signal during t-cell activation NOTCH3 Intracellular Domain Regulates Transcription Canonical and Non-canonical Notch signaling alk in cardiac myocytes TSLP Photodynamic therapy–induced NF–kB survival signaling African trypanosomiasis – Homo sapiens (human) nfkb activation by nontypeable hemophilus influenzae Interleukin–6 family signaling Interleukin—6 family signaling The human immune response to tuberculosis Primary immunodeficiency — Homo sapiens (human) Interleukin—4 and Interleukin—13 signaling Extracellular vesicle—mediated signaling in recipient cells Negative regulators of DDX58/IFIH1 signaling Thymic Stromal LymphoPoietin (TSLP) Signaling Pathway Development and heterogeneity of the ILC family Inflammatory bowel disease (IBD) — Homo sapiens (human) Hematopoietic Stem Cell Differentiation Graft—versus—host disease — Homo sapiens (human) Inflammatory Response Pathway NOTCH3 Activation and Transmission of Signal to the Nucleus Differentiation of white and brown adipocyte Kit receptor signaling pathway TYROBP Causal Network IL—6 signaling pathway Signaling by NOTCH3 [5/44] Cytosolic DNA-sensing pathway – Homo sapiens (human) [7/63] Lung fibrosis [7/64] TGF-beta Receptor TGF-beta Receptor Signaling signal transduction through il1r Leishmaniasis – Homo sapiens (human) Heart Development Allograft rejection – Homo sapiens (human) Differentiation Pathway Cytokines and Inflammatory Response fc epsilon receptor i signaling in mast cells Non-genomic actions of 1,25 dihydroxyvitamin D3 Viral myocarditis – Homo sapiens (human) in diabetic complications – Homo sapiens (human) in diabetic complications – Homo sapiens (human) in diabetic complications – Homo sapiens (human) in controlled in the complexity and controlled in the controlled in t AGE-RAGE signaling pathway in diabetic complication abetic complications – Homo sapiens (human) [1 role of mef2d in t-cell apoptosis Rheumatoid arthritis – Homo sapiens (human) Microglia Pathogen Phagocytosis Pathway Adipogenesis [13 Vitamin B12 Metabolism Endochondral Ossification Endochondral Ossification Iolos IL6 7/74 Amoebiasis – Homo sapiens (human) 1996 RUNX2 regulates bone development 13/32 Type I diabetes mellitus – Homo sapiens (human) 4/43 Viral Acute Myocarditis 7/76 CD4 T cell receptor signaling–JNK cascade 15/55 Legionellosis – Homo sapiens (human) 5/55 Integrin cell surface interactions 16/67 BMP2 signaling TGF–beta MV 15/56 Type 2 papillary renal cell carcinoma 3/34 ECM proteoglycans 15/57 Epithelial to mesenchymal transition in colorectal cancer [14/160] Constitutive Signaling by Aberrant PI3K in Cancer [6/69] IL–17 signaling pathway – Homo sapiens (human) 3/35 NF–kappa B signaling pathway – Homo sapiens (human) 3/35 NF–kappa B signaling Pathway – Homo sapiens (human) 3/36 Photodynamic therapy–induced HIF–1 survival signaling 3/36 Photodynamic therapy–induced HIF–1 survival signaling 19/110 mmune network for IgA production – Homo sapiens (human) 14/49 -log10(P.adjust) Intestinal immune network for IgA production – Homo sapiens (human) [4/49] TNFR2 non-canonical NF-kB pathway |4/50| Protein alkylation leading to liver fibrosis |4/50| Transcriptional regulation by RUNX2 |6/75| Proteoglycans in cancer – Homo sapiens (human) [16/201] Neural Crest Differentiation [8/101] Pertussis – Homo sapiens (human) [6/76] Chagas disease (American trypanosomiasis) – Homo sapiens (human) [8/102] Allograft Rejection [7/91] Oncostatin M Signaling Pathway [5/65] Oncostatin M Signaling Pathway | 5/68 C-type lectin receptor signaling pathway - Homo sapiens (human) [8/104 Th1 and Th2 cell differentiation - Homo sapiens (human) [7/92 JAK-STAT [8/106 Cardiac Progenitor Differentiation | 4/58 Response to elevated platelet cytosolic Ca2+ [10/134 Pl3K/AKT Signaling in Cancer [7/94 t cell receptor signaling pathway | 4/58 RANKL-RANK (Receptor activator of NFKB (ligand)) Signaling Pathway | 4/58 Writ 15/68 PI5P, PP2A and IER3 Regulate PI3K/AKT Signaling 17/97 JAK STAT Molecular Variation 1 7/98 B Cell Receptor Signaling Pathway 17/98 TGF-beta signaling pathway – Homo sapiens (human) 16/85 Osteoclast differentiation – Homo sapiens (human) 19/128 Influenza A – Homo sapiens (human) 12/1711 Regulation of toll–like receptor signaling pathway 10/143 /nt signaling in hepatocellular carcinoma Platelet degranulation Hepatitis B – Homo sapiens (human) [elanogenesis – Homo sapiens (human) Senescence and Autophagy in Cancer [7/106] T-Cell antigen Receptor (TCR) Signaling Pathway [6/92] Transcriptional misregulation in cancer – Homo sapiens (human) [12/186] Interferon gamma signaling [6/94] T–Cell antigen Receptor (TCR) pathway during Staphylococcus aureus infection | 4/63 | Basal cell carcinoma – Homo sapiens (human) | 4/63 miRNAs involvement in the immune response in sepsis Leukocyte transendothelial migration – Homo sapiens (human) GPCR signaling–G alpha q CD4 T cell receptor signaling-NFkB cascade Hematopoietic cell lineage - Homo sapiens (human) CD4 T cell receptor signaling [Ebola Virus Pathway on Host [Tuberculosis - Homo sapiens (human) [1] Wnt Signaling [Tuberculosis – Homo sapiens (human) [9/147] Breast cancer – Homo sapiens (human) [9/147] GPCR signaling–G alpha i [16/262] Folate Metabolism [4/66] Acute myeloid leukemia – Homo sapiens (human) [4/66] AGE–RAGE pathway [4/66] TGF–beta Signaling Pathway [8/132] FGF [4/67] Signaling by Interleukins Breast cancer pathway [9/154] TGF_beta_Receptor [10/174] KitReceptor [4/70] KitReceptor [4/70] Cytokine Signaling in Immune system [26/45& Integrin [7/124] Th17 cell differentiation – Homo sapiens (human) [6/107] EGF-EGFR Signaling Pathway [9/162] Focal Adhesion [11/198] Regulation of Insulin–like Growth Factor (IGF) transport and uptake by Insulin–like Growth Factor Binding Proteins (IGFBPs) [7/127] Human T-cell leukemia virus 1 infection – Homo sapiens (human) [12/219] Post-translational protein phosphorylation [6/10] Human Complement System [5/92] Hepatocellular carcinoma – Homo sapiens (human) [9/168] Pathways in cancer – Homo sapiens (human) [9/168] Pathways in cancer – Homo sapiens (human) [6/113] FoxO signaling pathway – Homo sapiens (human) [7/132] Mesodermal Commitment Pathway [8/153] TGF-beta super family signaling pathway canonical [6/115] Mesodermal Commitment Pathway TGF-beta super family signaling pathway canonical Hippo signaling pathway - Homo sapiens (human) JAK STAT pathway and regulation [Prostate cancer - Homo sapiens (human) VEGFA-VEGFR2 Signaling Pathway [Interferon Signaling Focal adhesion - Homo sapiens (human) [Epstein-Barr virus infection - Homo sapiens (human) [Wht Signaling Pathway and Pluripotency Necroptosis - Homo sapiens (human) [-cytokine receptor interaction - Homo sapiens (human) [

Necroptosis – Homo sapiens (human)
Cytokine-cytokine receptor interaction – Homo sapiens (human)
Extracellular matrix organization
Human papillomavirus infection – Homo sapiens (human)
Pl3K-Akt Signaling Pathway
MAPK signaling pathway – Homo sapiens (human)
Cellular senescence – Homo sapiens (human)
Fluid shear stress and atherosclerosis – Homo sapiens (human)
Cell adhesion molecules (CAMs) – Homo sapiens (human)
Gastric cancer – Homo sapiens (human)

Gastric cancer – Homo sapiens (human) 10/149, Focal Adhesion–Pl3K–Akt–mTOR–signaling pathway [12/302] IL–7 signaling f7/185
Ras signaling pathway – Homo sapiens (human) 18/232 MAPK Signaling Pathway 18/246
Signaling by Receptor Tyrosine Kinases 112/423 EGFR1 12/457
